OUR MISSION is to provide high-quality, affordable health care services and to improve the health of our members and the communities we serve.

For 45 years, as the largest nonprofit health plan in Colorado we've helped improve the health of Coloradans through charitable contributions, sponsorships, preventive health education, community service work, community health initiatives, and more. We invest our expertise, time, and passion—in addition to dollars—to helping the most vulnerable people in our communities gain access to quality health care services. We believe everyone has the right to high-quality, affordable health care because it's the right thing to do.

We understand that good health extends beyond the doctor's office and the hospital. Good health for the entire community requires equity as well as social and economic well-being. To be completely healthy, people need access to healthy and nutritious foods, clean air, successful schools, safe parks and playgrounds. We work hard to meet communities where they are, and to spend time in schools and with local groups, listening to people who are accessing services. As a result, we focus our efforts on the following key areas:

- **Health Access**
- **Healthy Environments**
- **Health Knowledge**
- **Educational Theatre Programs**
- **Community Relations**

Health Access

Care and coverage

Improving access to health care for people with limited incomes is fundamental to our mission. We make health care affordable through our innovative Charitable Health Coverage program and through traditional charity care in our medical offices and partner hospitals. We also participate in public programs such as Medicaid, Child Health Plan Plus (CHP+); and Medicare low-income programs.

Care equity

The Care Equity Project (CEP) is a collaborative effort to assist community health care providers, staff, and physicians in improving health equities for patients living with limited financial resources. The project supports the increasing number of people living with limited financial resources who are seeking medical care by personalizing the type of care, promoting empathetic care, and enriching the quality and hospitality of health care delivery. Our Educational Theatre team partners with CEP through educational and experiential activities.

Safety Net partners

We work closely with community health centers, public hospitals, and health advocacy groups to exchange knowledge and expertise for improvement and expansion of services. We provide technical assistance, educational and financial support. We help build Safety Net capacity through workforce development, improving quality, and supporting effective clinic-to-community integration.

Healthy Environments

Healthy communities

We support sustainable, comprehensive efforts in schools, worksites, and neighborhoods that affect the overall health of Coloradans and our communities. Our goal is to surround people with healthy choices by influencing public policy and organizational practices that focus on Healthy Eating/Active Living (HEAL). We leverage resources to increase access to healthy affordable food, walking and biking, and behavior change programs through equal distribution of opportunities so that all Coloradans can make healthy choices.

Environmental stewardship

Practice Greenhealth recently presented us with the '2013 Partner for Change Award.' This award is given to organizations that have shown significant progress in improving environmental performance. Our significant presence in communities around Colorado means environmental health is part of our business. We're taking a leading role in sustainable design of our medical offices, reducing greenhouse gas emissions, waste minimization, and supporting sustainable food systems.

Health Knowledge

Developing and disseminating knowledge

We're committed to advancing health through research, education, charitable contributions, and training. Our research teams have been at the forefront of some of the most exciting medical findings. We share

this knowledge by educating practitioners, translating knowledge into clinical practice, empowering consumers, and keeping policy makers informed with evidence-based data. Knowledge is powerful medicine, sharing makes it even more potent.

Educational Theatre Programs

Healthy students, communities, and schools

About 3 million Coloradans have increased their knowledge and awareness of healthy solutions through the award-winning Educational Theatre Programs. With the framework of positive youth development and a strength-based approach, these free dynamic plays, skill-building workshops, and youth engagement projects tackle nutrition, physical activity, poverty, hunger, substance abuse, violence, bully prevention, stress relief, and effective communication.

Community Relations

Service and more

We further support community needs, activities, and events through sponsorships, board placements, and community service. As a result, economic vitality and healthy communities are supported. We make it easy for employees to give back to our local communities by allowing them annually 96 hours of paid time away from their everyday responsibilities to engage with local nonprofit organizations.
