- ◆ Race, class, gender, ability, language, etc
- ◆ District size, location
- ◆ Formula for measuring:

Examples:

- *Risk ratio that measures group comparison*
- *Indicate how much higher a level is (i.e. 2 times the population)*
- *Indicate or have metrics for how long it continues and if improvements occur (ie, if this occurs for two years)*

→ What information do we still need to accomplish this task? What should we be aware of as we are defining this? Who do we still need to hear from?
