## Unit Description

---

This unit, [Improvisation and Scene Creation](#), uses improvisation in the creation of a scripted piece adapted from other source material. Across the unit, students will explore various literary plots (e.g. fairy tales) through improvisation activities to inform story and character development. Group collaboration will lead to the culmination of the unit in which students create a scripted scene derived from a story told from a perspective different from the original narrative (the point of view of a different character or an inanimate object in the story).

## Performance Assessment Description

---

Stimulus Material Prompt for Students: Your acting troupe has been asked by a local library to present as a part of their annual Fairy Tale Festival. They are pleased that you have expertise in presenting new and fresh perspectives on traditional fairy tales and have asked that you perform a scene from a fairy tale in a new and exciting way. Using improvisational techniques, you will work within small groups to present a scene from the selected fairytale from a different perspective. In other words, you will tell the story from a different character, animal, or object in the traditional fairytale that is typically neither the center nor the focus of the story. You will perform your final performance for younger students in your schools.

Notes to Instructors: The following rubric is aligned to the standards and a reflection for the actor/performer role. A rubric for the other roles will need to be developed by instructor and is not inherent in the seventh grade evidence outcomes.

### **Performance Assessment Development Process**

The work of the Colorado Content Collaboratives is intended to support effective instructional practice by providing high quality examples of assessment and how assessment information is used to promote student learning.

The new Colorado Academic Standards require students to apply content knowledge using extended conceptual thinking and 21st century skills. Performance assessments have the highest capacity to not only measure student mastery of the standards but also provide the most instructionally relevant information to educators. Further, performance assessments can integrate multiple standards within and across content areas, providing educators a comprehensive perspective of student knowledge and giving students the opportunity to demonstrate the degree to which they understand and transfer their knowledge.

*Performance Assessment - An assessment based on observation and judgment. It has two parts: the task and the criteria for judging quality. Students complete a task (give a demonstration or create a product) and it is evaluated by judging the level of quality using a rubric. Examples of demonstrations include playing a musical instrument, carrying out the steps in a scientific experiment, speaking a foreign language, reading aloud with fluency, repairing an engine, or working productively in a group. Examples of products can include writing an essay, producing a work of art, writing a lab report, etc. (Pearson Training Institute, 2011)*

The Content Collaboratives worked closely with the [Center for Educational Testing and Evaluation from the University of Kansas](#) to establish protocols for the development of performance assessments and to use those protocols to develop performance assessments that include scoring rubrics. The Performance Assessment Development Process includes a collection of resources to aid schools and districts that choose to engage in locally developing performance assessments. These resources can be accessed in the CDE Assessment Resource Bank at <http://www.coloradopl.org/node/12765>.

**The Performance Assessment Development Process** is best utilized when intending to create an assessment for culminating assessment purposes such as a unit, end of course, end of semester, or end of year summative assessment. Additionally, a district, BOCES, or school may wish to create a common performance assessment that can be used across multiple classrooms. Engaging in the Performance Assessment Development Process serves as evidence that an educator is participating in valuable assessment work that aligns to the Colorado Academic Standards, district curriculum, and district goals.

The performance assessments developed by the Content Collaboratives serve as high-quality examples of performance assessments that can be used for a variety of purposes. Scores from these performance assessments are used at the discretion of the district or school.
