3a. To what extent are most of the items or the tasks designed and formatted to be visually clear and uncluttered (e.g., use of white space, graphics, and illustrations)?		
Provide an explanation of your response:		
The teacher needs to read the directions and be familiar with the rubric in the front of the document. The assessment itself is uncluttered. "Clear & Uncluttered" Score	All=3, Some=2, None=1

3e. If applicable, what type of accommodations should be considered to ensure that students with special needs can fully access the content		
represented by the task or set of items reviewed? Accommodations are commonly categorized in five ways: presentation, response,		
setting, and timing and scheduling: • Presentation Accommodations — Allow students to access information in ways that do not require them to visually read standard print. These alternate modes of access are auditory, multi-sensory, tactile, and visual. • Response Accommodations — Allow students to complete activities,		
assignments, and assessments in different ways or to solve or organize problems using some type of assistive device or organizer. • Setting Accommodations — Change the location in which a test or assignment is given or the conditions of the assessment setting.		
 Timing and Scheduling Accommodations — Increase the allowable length of time to complete an assessment or assignment and perhaps change the way the time is organized. 		
 Linguistic Accommodations — Allow English language learners (ELLs) to access academic construct measured by reducing the linguistic load of an assessment. The accommodation is based on an ELL's limited English language proficiency, which is different than an accommodation based on a student's disability or a cognitive need. 		
3f: Identify and write down the accommodations permitted for this assessment:		

There are instructions for creating your own scenarios, cooperative learning allows for varied complexity and small group scoring. Methods of grouping would allow some accommodations as well.
